| বিদ্যাসাগর বিশ্ববিদ্যালয় VIDYASAGAR UNIVERSITY Question Paper |  |  |
| :---: | :---: | :---: |
| B.Sc. Honours Examinations 2020 <br> (Under CBCS Pattern) <br> Semester - III <br> Subject: GEOGRAPHY <br> Paper : C 6-T \& C 6-P <br> Statistical Methods in Geography |  |  |
| Full Marks : 60 (Theory : 40 + Practical : 20) Time : $\mathbf{3}$ Hours |  |  |
| Candiates are required to give their answer in their own words as far as practicable. <br> The figures in the margin indicate full marks. |  |  |
| [Theory] |  |  |
|  | Answer any two from the following : | $2 \times 20=40$ |
| 1. Define partition values and standard deviation. How do you find out the relationship of two variables. What is best fit line in linear regression? What is co-efficient of determination $\left(\mathrm{R}^{2}\right)$, and how do you estimate it in regression. |  |  |
|  | What is a random sampling? Discuss different methods of random sampling. | 5+15 |
| 3. What is the scale of measurement? Discuss different types of measurement scale and their implication in research.$5+15$ |  |  |
| 4. What is central tendency? How does the measures of central tendency help us to understand a geophysical process? |  |  |

## C 6-P <br> [Practical]

Answer any one from the following :

1. The Sex-Ratio of thirty blocks of a given state is given below :

| 897 | 927 | 949 | 941 | 949 | 916 | 954 | 937 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 961 | 939 | 917 | 948 | 939 | 970 | 944 | 881 |
| 941 | 938 | 958 | 833 | 962 | 955 | 952 | 883 |
| 937 | 925 | 959 | 893 | 933 | 944 |  |  |

(a) Construct a frequency distribution table with five equal classes.
(b) Calculate the mean, median and mode.
(c) Calculate the $3^{\text {rd }}$ decile and upper quartile.
(d) Estimate the standard deviation of the given distribution.
2. The following data shows the month wise rainfall in mm. and the temperature in ${ }^{\circ} \mathrm{C}$ of a given station.

| Month | Rainfall | Temperature |
| :--- | :---: | :---: |
| January | 3.0 | 17.5 |
| February | 17.0 | 19.0 |
| March | 15.0 | 33.2 |
| April | 152.0 | 26.5 |
| May | 400.0 | 32.5 |
| June | 1021.0 | 30.5 |
| July | 818.0 | 28.5 |
| August | 694.0 | 28.5 |
| September | 414.0 | 27.5 |
| October | 141.0 | 27.0 |
| November | 58.0 | 24.5 |
| December | 0 | 19.0 |

(a) Draw the scatter diagram showing the distribution of rainfall against temperature.
(b) Calculate the Spearman's Rank Correlation.
(c) Perform a linear regression between rainfall and temperature and interpret the result. $5+5+10$
3. The month wise rainfall data (in mm ) of the following two stations are given below.

| Station - A | Station $-B$ |
| :---: | ---: |
| J -0 | $\mathrm{~J}-0$ |
| $\mathrm{~F}-1.2$ | $\mathrm{~F}-0$ |
| $\mathrm{M}-0.5$ | $\mathrm{M}-0.3$ |
| $\mathrm{~A}-0.1$ | $\mathrm{~A}-0$ |
| $\mathrm{M}-5.0$ | $\mathrm{M}-2$ |
| $\mathrm{~J}-30$ | $\mathrm{~J}-10$ |
| $\mathrm{~J}-100$ | $\mathrm{~J}-30$ |
| $\mathrm{~A}-250$ | $\mathrm{~A}-80$ |
| $\mathrm{~S}-240$ | $\mathrm{~S}-100$ |
| $\mathrm{O}-50$ | $\mathrm{~N}-50$ |
| $\mathrm{~N}-11$ | $\mathrm{~N}-50$ |
| $\mathrm{D}-5$ | $\mathrm{D}-2.5$ |

Based on the measures of dispersion, which of these two stations do you think have highest degree of consistency?
