BMLT 3rd Semester Examination, 2019

HAEMATOLOGY

PAPER – VII

Full Marks : 40

Time : 2 hours

Answer **Q.No. 1** and any **three** from the rest

The figures in the right-hand margin indicate marks

Candidates are required to give their answers in their own words as far as practicable

Illustrate the answers wherever necessary

U – XIII

- 1. Answer any five questions : 2 × 5**
- (a) What is haemoglobin ?
 - (b) What is buffy coat ?
 - (c) What is pluripotent stem cell ?

(Turn Over)

(2)

- (d) Write the graduation and bore diameter of Westergren pipette.
- (e) Write the names of different types of thalassaemia.
- (f) Write the types of EDTA.
- (g) Write the advantages of venous blood sampling.
- (h) Why is first drop of blood discard during collection of blood from finger tip ?
2. (a) What is hematocrit ?
- (b) Write the laboratory method of hematocrit determination.
- (c) What is true hematocrit ?
- (d) What is body hematocrit ? $2 + 4 + 2 + 2$
3. (a) Why Westergren's method is more preferable than Wintrobe's method for estimation of ESR.

(3)

- (b) What is rouleaux formation ?
- (c) Write the factors which affecting ESR.
- (d) Write the clinical significance of ESR. $2 + 2 + 3 + 3$
