# PG CBCS M.SC. Semester-I Examination, 2022 DEPARTMENT OF MATHEMATICS PAPER: MTM 106 (GRAPH THEORY)

### Full Marks: 20

The figures in the right-hand margin indicate full marks. Candidates are required to give their answers in their own words as far as practicable.

### 1. Answer any <u>TWO</u> questions from the following: 2×2=04

- a) Prove that every connected graph has at least one spanning true.
- b) Find the chromatic number  $\chi(G)$  of the following graph G.

c) Find that how many 3-regular graphs are there with nine vertices.

d) Draw the digraph *G* corresponding to adjacency matrix  $A = \begin{pmatrix} 0 & 0 \\ 0 & 0 \end{pmatrix}$ 

ICE:			
/0	1	1	0
0	0	1	0
0	0	0	1
1	0	0	0/
	0 0 0 1	$\begin{array}{c} 1 \\ 0 \\ 0 \\ 0 \\ 0 \\ 1 \\ 0 \\ 1 \\ 0 \\ \end{array}$	$\begin{array}{c} 1 \\ 1 \\ 0 \\ 0 \\ 0 \\ 1 \\ 0 \\ 1 \\ 0 \\ 0 \\$

 $2 \times 4 = 08$ 

## 2. Answer any <u>TWO</u> questions from the following:

a) Show that the graphs G and G' are isomorphic

P.T.O.

b) Consider the following graph G. Find centre, diameter, cutpoints and bridge of G.

- c) Define binary tree. Find the number of pendent vertices in a binary tree with n vertices.
- d) Verify Euler's formula for the following graph G and also find the degree of the outside region of G.
   3+1

**3.** Answer any <u>ONE</u> questions from the following: 1×8=08
a) Find a minimal spanning tree of the following weighted graph.

b) (i) State and prove Euler's theorem for a connected planar graph.
(ii) Prove that the chromatic polynomial of any cycle C<sub>n</sub> of length n is p<sub>n</sub>(λ) = (λ - 1)<sup>n</sup> + (-1)<sup>n</sup>(λ - 1).
