Full Marks: 100

Time : 3 hrs.

Attempt all questions

- Discuss the Glycolysis pathway of carbohydrate metabolism. Why PFK is called rate limiting enzyme of glycolysis? What is gluconeogenesis?
   6+2+2
- What is Km? Discuss the factors affecting enzyme action. Write a short note on Competitive inhibition.
- Which vitamin deficiency leads to Night blindness? Mention the sources, RDA and functions of that vitamin.
- What is nucleotide? Mention three differences between A, B and Z form of DNA. Discuss Chargaff's rule.
   1+3+6
- Mention two differences between saturated and unsaturated fatty acid. Give two examples of both essential fatty acid and non-essential fatty acid. Classify phospholipids.
  2+4+4
- 6. What is BMR? Discuss the factors affecting BMR. Write a short note on SDA. 2+5+3
- Discuss the β-oxidation pathway of palmitic acid. What is ketosis? Give two examples of ketone bodies.
  6+2+2
- 8. Write a short note on transamination. Discuss the pathway of urea cycle. 4+6
- Mention two differences between total acidity and free acidity. Discuss the histamine test for gastric acidity. Mention three indications of GFT.
  2+5+3
- 10. What is replicon? Discuss the Meselson-Stahl experiment of DNA replication. Mention the enzymes and proteins of DNA replication. 1+5+4
