Practical Paper

1. Estimate the moisture content of given sample of fish feed and write the procedure. 2+3 = 5
2. Suppose rice bran and soybean meals are available as feedstuffs to prepare a diet for carp that was 27 % crude protein. Rice bran has 8.2 % and soybean meal has 44 % of crude protein. If we make 100 kg of feed how much amount of rice bran and soybean meals are required? 1 × 10 = 10
3. Submission of Lab notebook 2
4. Viva-voce 3
